saunum

Smart sauna control unit

Saunum AirIQ

Saunum AirIQ is a next-generation smart sauna control unit that is convenient and easy to use. According to sauna data, AirIQ optimizes the sauna's heating time, reducing energy consumption. With three adjustable sauna modes, you can activate the heater with just a few taps on the screen. Once the sauna is ready, simply turn on the Saunum climate control system and enjoy an incredibly relaxing sauna experience with easy breathing and mild heat. As Saunum AirIQ also supports our AutoLeil automatic water dispensing solution, you can now operate and adjust this feature directly from the installed touch control panel. A ModBus integration option has also been added for connecting the device to smart homes.

Touch control panel

Air Button
inside sauna room

Temperature selection:	40–100 °C
Heater operating time:	Up to 12 hours in a private sauna or 18 hours in a public sauna
